SUMMARY

Targeting full-stack developer roles in a reputable organization to improve knowledge and career growth. I am seeking an innovative workplace that challenges me to grow and acquire new skills. Committed to staying updated with industry trends to provide innovative solutions.

EXPERIENCE

Web Developer Intern

Oasis InfoByte   **April 2023 - May 2023**

- I created a web application that uses the Fetch API in JavaScript to retrieve user data from a remote server with a 95% data retrieval accuracy rate and dynamically displays the user profiles on the webpage.
- Implemented functionality to fetch user data from an API, display a loading message, and dynamically generate user cards with avatar, name, email, and ID, enhancing the user experience by 60%.

Web Developer Intern

Let's GrowMore   **October 2022 - November 2022**

- Developed PG-LIFE, an e-commerce site for student accommodation in major cities, using HTML, CSS, JavaScript, and Bootstrap, which improved user engagement by more than 50%.
- Ensured a responsive, user-friendly design with interactive features like reviews and filtering options, resulting in a more than 65% increase in user satisfaction.
- Trying to implement advanced search functionality allowing users to filter accommodations by location, price, and amenities, streamlining the process of finding suitable housing options reducing search time by 25%.

PROJECTS

Blood Bank Management System

github.com/raqimfraz09/Blood-Bank-Management-System · March 2024 - April 2024

- Implemented responsive interfaces using React.js for donors, administrators, hospitals, and organizations. Integrated Redux for state management, improving user experience and functionality by 80\% in user interactions.
- Created RESTful APIs with Node.js and Express.js for CRUD operations, supporting the management of over 300 blood stock entries, including blood group, type, quantity, and donor details.
- Admin panel oversight managed 100+ user accounts, ensuring data integrity and monitoring blood supply levels. Coordinated between 20+ donors and recipients, supported by robust backend APIs handling 250+ transactions monthly.

PG-LIFE

raqimfraz09.github.io/PG-Life/ · October 2022 - November 2022

- Developed PG-LIFE, an e-commerce website for students, showcasing over 150+ accommodation listings, including PGs, flats, and hostels in New Delhi, Bangalore, and other major cities, built using HTML, CSS, JavaScript, and Bootstrap.
- Included user reviews and advanced filtering options, enhancing functionality and interactivity. We achieved a 70% improvement in user satisfaction and a more than 50% increase in successful residence searches.
